

YUSEF HABBEH

Software Engineer | Flutter Developer

Amman, Jordan | 078-154-3080 | yousef.habbeh@hotmail.com | [LinkedIn: Y-Habbeh](#) | [GitHub: YHabbeh](#)

PROFESSIONAL SUMMARY

Software engineer with over **5** years of experience, specializing in Flutter development. Proficient in building cross-platform mobile applications using Flutter SDK with state management patterns (Bloc, Cubit). Skilled in integrating RESTful APIs and working collaboratively within team environments. Background in data science and machine learning with hands-on experience in deep learning, computer vision, and predictive modeling.

WORK EXPERIENCE

Flutter Developer | **Futeric** — 2025 – Present

- Developing cross-platform mobile applications using Flutter SDK.
- Implementing clean architecture and state management solutions.

Flutter Developer | **Integrated Technology Group** — 2022 – 2025

- Proficient in Flutter SDK fundamentals and state management (Bloc, Cubit).
- Skilled in designing and implementing UI using Flutter widgets and third-party packages.
- Experience integrating RESTful APIs and parsing JSON data for seamless app functionality.
- Strong communicator, adept at troubleshooting, and contributing effectively within team environments.

Data Scientist | **SHAI For AI** — 2021 – 2023

- Mentored students in data science fundamentals (preprocessing, modeling, evaluation) using industry best practices.
- Led workshops and projects to reinforce data analysis and machine learning skills.
- Guided project development and applied machine learning to real-world datasets.

Data Science Intern | **SHAI For AI** — 2021 – 2022

- Built neural networks for computer vision and loan prediction using TensorFlow and Keras.
- Learned regression, classification, and clustering techniques through Kaggle projects in Python.

SKILLS & COMPETENCIES

- **Programming Languages:** Python, SQL, MATLAB, Dart
- **Mobile Development:** Flutter SDK, Bloc/Cubit state management, RESTful API integration, JSON parsing
- **Development Tools:** Android Studio, Visual Studio Code, Git/GitHub
- **Data & ML Environments:** Google Colab, Jupyter Notebook
- **Machine Learning:** Statistical Modeling, Machine Learning Algorithms, Deep Learning (TensorFlow, Keras)
- **Data Visualization:** Matplotlib, Seaborn
- **Big Data Processing:** Hadoop, Spark, MapReduce, Hive

PROJECTS

Professional Projects — Collaborative Contributions

BinDawal Bank — Flutter, BLoC, Clean Architecture

- Engineered core banking UIs covering financial transactions, account overviews, and debit/credit card management.
- Architected the app with Clean Architecture principles for maintainability, scalability, and quality assurance.
- Implemented BLoC state management to handle complex financial state transitions with high-performance execution.

Dliv — Logistics & On-Demand Delivery Platform — Flutter, Geospatial Routing, Real-Time Sync

- Engineered an advanced geospatial routing solution that dynamically sequenced multiple delivery waypoints into an optimized single path under strict sequential dependencies.
- Independently developed the end-to-end platform architecture from conceptualization to a deployment-ready state, prioritizing low-latency real-time sync between drivers and dispatchers.

Sanad — Ministry of Foreign Affairs — Flutter, REST APIs, Government Standards

- Led development of micro-services digitizing legal government processes (marriage declarations, local/general sponsorships).
- Integrated complex Ministry of Economy APIs handling sensitive government data under strict security protocols.
- Adhered to enterprise-grade government standards for code architecture and UI/UX compliance.

EduWave — Flutter, BLoC, Dashboard Development

- Developed and optimized assessment and assignment modules for both student engagement and educator administration.
- Built administrative dashboards enabling educators to monitor class progress, author exams, and track student grading.

WaveDMS — Document Management System — Flutter, Digital Signatures, Workflow Automation

- Executed debugging and performance optimization protocols, significantly improving system stability.
- Pioneered a digital document signature feature with automated routing for seamless multi-department authorization.

ITG Timecard — GPS Attendance System — Flutter, GPS, Anti-Spoofing

- Upgraded GPS-based attendance tracking with advanced anti-spoofing mechanisms to ensure location data integrity.
- Engineered employee management modules for leave and departure request submission and tracking.

Independent Projects — End-to-End Development

AppointDent — Dental Clinic Manager — Flutter, Firebase, BLoC, Clean Architecture

- Architected and deployed a full end-to-end dental clinic management solution from inception.
- Integrated Firebase Authentication and Cloud Firestore for secure user authorization and real-time cloud database.
- Applied BLoC as the core state management backbone, delivering fluid performance and exceptional UX.

Autism Detection API — Python, Flask, TensorFlow, Keras, VGG16

- Built a Flask REST API classifying images for autism indicators using a pre-trained VGG16 deep learning model.

EDUCATION

Bachelor of Computer Information Systems

The University of Jordan | Amman, Jordan | 2017 – 2021 | GPA: Very Good
